NEW MEMBER SPONSORSHIPS

We want to give a warm and sincere welcome to our newest Member Sponsors, Jim and Sandi Cattelona while also thanking them for their generous financial donation to the club. Donations are what keep our club dues so competitive and allow us to enjoy many of our activities.

Jim and Sandi have been with our club for quite some time, always promoting a spirit of sportsmanship and good will. They both sport some fancy wheels – Jim with his black 1936 Plymouth and Sandi with her shiny baby blue 1965 Malibu SS. Jim and Sandi are great ambassadors of our club, always attending club functions, events, along with appearances at charity functions.

Another new Member Sponsor we want to thank and welcome to the AMCOMC family is George Wall Ford Lincoln of Red Bank. Sales Manager Jeff Fraley spearheads the efforts for the Ford and Lincoln dealership and brought a 2015 Mustang Convertible at the Keyport St. Patrick’s Day Parade.

A great opportunity offered to us by Jeff Fraley, with the support of the entire George Wall ownership, is for us to have our very own car show at the dealer’s parking lot. The first of such events is scheduled to take place on Sunday, April 17, 2016 from 10am to 2pm in Red Bank. This is a non-judging show.

TECH TIPS

Before you take out your antique automobiles to the first shows of the season, you may want to pamper your baby with the finest washes and waxes. You might want to strip the old wax and remove a buildup that is not very noticeable to the eye, but is as you pass your hand over the surface.

One method is with the clay bar – this method cleans and removes all dirt, soot, and grime from the paint surface. This does take a lot of time and effort, but is the best way to clean the paint surface.

Another way is a non-abrasive detergent cleaner stripper. This is a chemical cleaner that has to be rinsed off quickly with water in a shaded cool place. Direct sun light can cause blemishes in the paint, but if properly used, this can be a quick step to get your antique automobile ready for the finest waxes.

The easiest way (but a bit costly) is taking your car to a professional shop. All you do is drop off your keys and pay the bill – they do everything else!

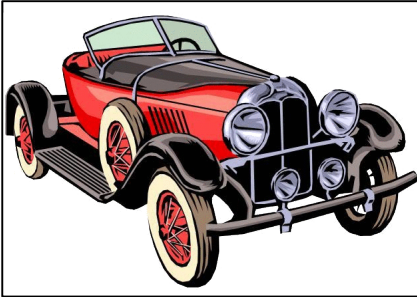

This month’s Tech Tips column was submitted by President Jack Torres. To contribute in the future, submit your article to TechTips@amcomc.org.

FOR SALE BY OWNER: 1962 Ford Thunderbird 390 V4 Auto

Turnkey vehicle has been in the family for 35+ years and is priced to sell at \$9,000. Visit www.amcomc.org for more details!

WHAT'S IN THE BOX?

In the box is the parachute that helps the pilot jump out of his plane while 25,000 feet up in the air and safely land to the ground. It is the life jacket in the boat, keeping the sailor’s afloat if the boat capsizes. In our case as a car club, it is **the lifeline to quickly remedy a potential horrific situation**. The box contains many essential tools, parts, and equipment to keep us mobile and help repair any minor mishap we may have along the way. Be it a parade or a car show, the box is ready for anyone stranded. Gasoline, motor oil, anti-freeze, brake fluid, rags, fuses, a funnel, gloves, tape, battery terminals, even an essential roll of toilet paper is in the box. The box also includes a mixture of essential widely used tools to get the job done and quickly get you back on the parade line or safely home. A battery booster with an air compressor goes along for the trip. **This is necessary for us as a club to better equip ourselves in cases of emergencies and never leave anyone stranded.**
